

WATER

The Nikken PiMag technology to create “living water”

Water – essential for all life on Earth

The Qualities of Healthy Water

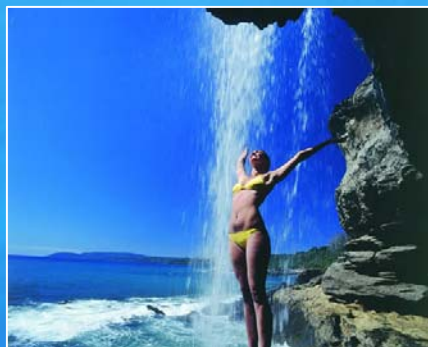

- Pure
- Slightly alkaline
- Mineralized
- Dynamic, energized
- In sufficient quantity

If all the water on the planet was put into a bottle, the drinkable portion would be the equivalent of the water that could be held in the cap.

The Importance of Water for Health

- Increase cellular oxygenation
- Transport nutrients
- Hydrate the cells
- Aid in digestion and elimination
- Conduct magnetism in the body
- Eliminate waste products and toxins from the cells
- Regulate body temperature
- Lubricate the joints
- Improve the natural healing process of the body

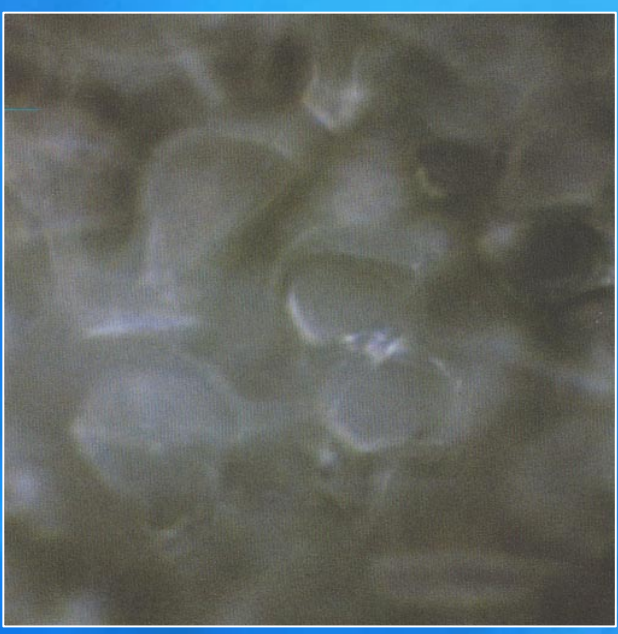

Water : 30% of our daily oxygen requirement

Water – A critical problem today!

Contaminants, acids, chlorine, pesticides, fertilizers, animal waste, industrial waste, heavy metals, etc. all pose a tremendous threat to the quality of our water.
What are the solutions?

Tap water or bottled water
=
DEAD water

Its structure is chaotic

WHICH DO YOU CHOOSE?

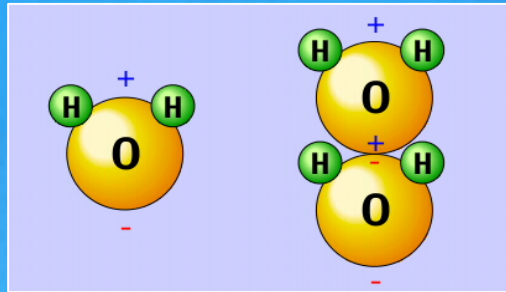

Water as nature intended (pi-mag water)
=
LIVING water

Its structure is HEXAGONAL

Properties of Water

Composed of one oxygen atom and 2 hydrogen atoms.

Public water systems treat water so that it is bacteriologically safe. Most do so through the cheapest method possible – chlorination of the water to destroy the harmful bacteria. However, chlorine is a known carcinogen so that creates its own problems. In addition, most pipes that deliver water to our homes are contaminated and deteriorating.

It is, therefore, up to each of us IN OUR HOMES to find a way to restore water to a healthy, energized state before consuming it.

Pi-mag Water Systems

**Aqua Pour Express
Capacity = 2 litres**

Micro-Sponge Pre Filter

- removes larger impurities.

Filter Cartridge

Ion Exchange Resin: Serves as a filter and water softener Exchanges ions and charges negative ions - changes heavy metals

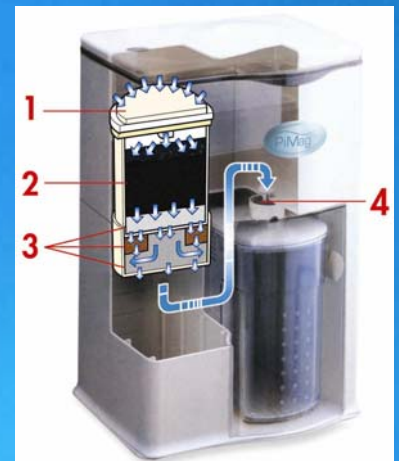

Activated carbon: (made from coconut shell) Simple, natural form of absorption filtering. Removes chlorine, unpleasant odors, colours, etc. Carbon has been used in laboratories and hospitals for centuries as a simple, natural form of filtration.

Pi Ceramics: Reproduces conditions for creating pi-water (pH balanced)

Zeolite: This is a granular material that provides additional filtration while reducing water hardness and odors. Zeolite is diatomaceous earth.

Mineral stones. They create a natural alkalinity and make the water the correct pH. The mineral stones provide another natural form of filtration. The stones in the lower tank are found at 800 meters below sea level --Shiseido Cosmetics uses these stone to moisturize the skin. There are 18 kinds of choice minerals in the stones.

Magnetic Ring The filtered Pi-mag water passes through a 1,200 gauss magnetic field as it exits the tank to produce magnetized, ionized water

The Aqua Pour Gravity system is also available in 10 litre capacity models These models have the gold seal of the World Water Quality Association (W.Q.A.)

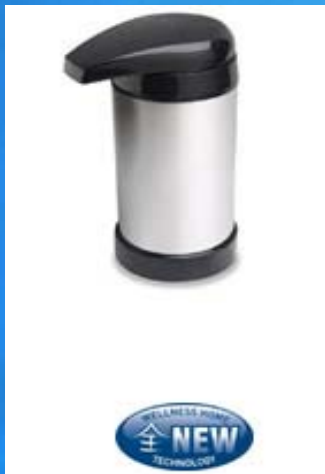

Pi-Mag Water Systems

PiMag™ Deluxe Under Counter Water System

Cleaner, better water — instantly on demand. This system provides a defense against the broadest range of pollutants and substances found in some municipal water supplies. In more than 30 contaminants tested, the reduction rate is greater than 99%! Multiple filter stages, together with pi and magnetic technologies, produce the “water of life.” The PiMag Deluxe Under Counter Water System filters water directly from household plumbing so you have a practically unlimited supply.

The PiMag Deluxe Countertop Water System

This system features the same advanced filtration and PiMag technology as the PiMag Deluxe Under Counter Water System — with the same results: superior filtration that reduces more than 30 recognized contaminants, and an instant supply of PiMag water. The design of the PiMag Deluxe Countertop Water System allows you to attach it in minutes to a faucet, for instant PiMag water on demand. No plumbing modifications are required, yet you're able to enjoy the advantages of PiMag water right from the tap.

After filtering the water

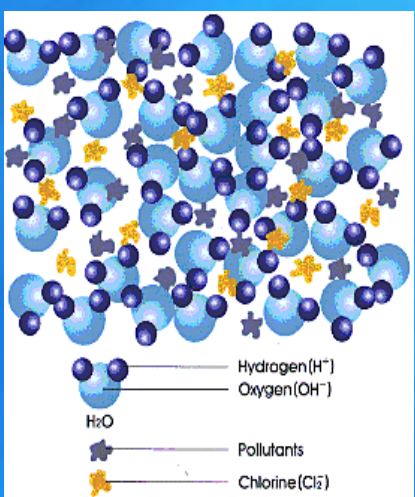

PiMag Optimizer

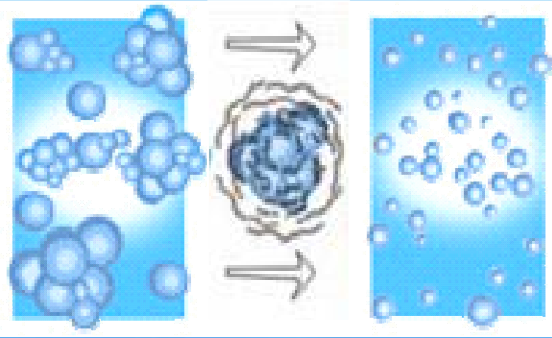

- Oxygenates the water
- Introduces negative ions
- Breaks up the clusters of water molecules
- Magnetizes the water using a 4400 Gauss base
- Adds minerals to the water through the pi-ring
- Creates an ideal hexagonal water formation.

Structure of water

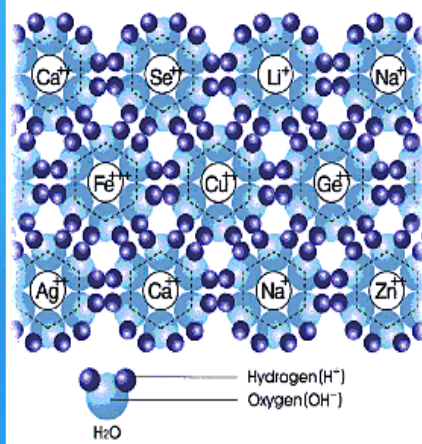

Clustered water

Oxygenation, Ionization, Crystallization, Magnetisation

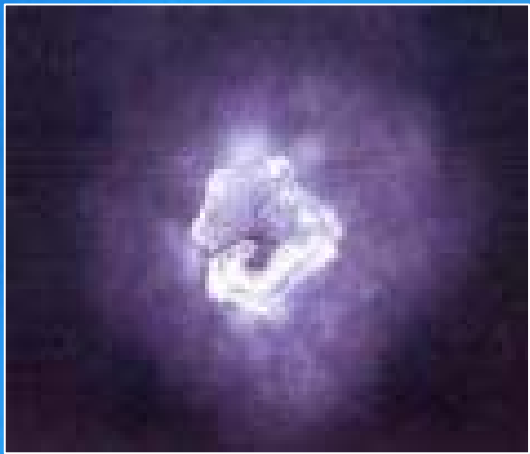

Hexagonal water

Properties of Optimized Water

Distilled Water

Optimized distilled water

When we drink this kind of pure, energized water, our cells assimilate it more easily, thus creating better hydration for all of the body's functions.

PiMag Ultra Shower System

While taking a shower, we absorb water through the pores of our skin. It is therefore important to eliminate all of the impurities in our shower water, particularly the chlorine as it is a known carcinogen.

Impact of water

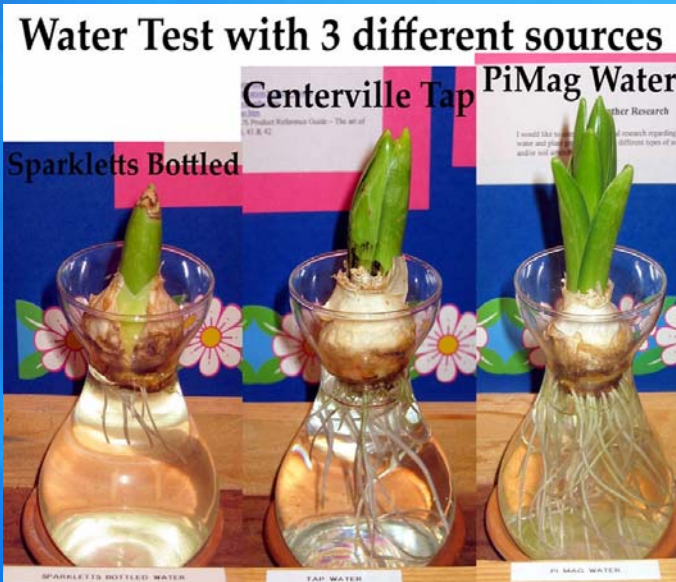

Tomato soaked in regular water for 2 hours

Tomato soaked in pi-mag water for 2 hours.

These 2 tomatoes were kept at room temperature for 36 days under identical conditions.

Three bulbs were placed in 3 different waters for a period of 8 weeks and results were recorded weekly. Which water would you want to give your body?

Weekly Growth Results

Pi-Mag Water – Essential for good health!

- Purified
- Re-vitalised
- Ionised
- Oxygenated
- Rich in minerals
- pH balanced
- Returned to its natural, healthy hexagonal shape

Optimized water is crystalline in nature, just like natural spring water. You can re-create 'living water' in your own home with the Nikken pi-mag water systems.
